

Clinical Neuropsychopharmacology and Therapeutics

Animal Rights Policy

Clinical Neuropsychopharmacology and Therapeutics (CNPT) requires that all articles reporting on data from animal testing must indicate in the "Subjects and Methods" section that the national standards for the care and use of laboratory animals were followed and the approval of the testing design by the affiliated institution's Animal Care and Use Committee.

Further guidance on animal research ethics is available from the International Association of Veterinary Editors' Consensus Author Guidelines on Animal Ethics and Welfare (<http://veteditors.org/ethicsconsensusguidelines.html>).
